What's in this month's issue

- **Latest University News** –
8 September – London School of Architecture module leader shortlisted for 2025 RIBA Stirling Prize.
- **Things you need to know this week** –
Government's New Homes Accelerator initiative to unlock 12,000 homes on six sites.

Happy reading!

Issue 9 – October 2025

Welcome to the University of the Built Environment's e-Library monthly *Knowledge Foundations* publication, a compendium of news and views, research and resources relating to the educational sector and Built Environment.

The e-Library aims to disseminate information, promote current awareness, and share good practices, to assist in the continual professional development of all those working and aspiring to work within the Built Environment/Property and Construction industries.

"The mission of librarians is to improve society through facilitating knowledge creation in their communities." (R. David Lankes)

The initial aim of this library current awareness service was to help keep students and staff informed of the education sector and industry-specific news, share current and best practices, highlight the latest research, and identify case studies that will support studying and supplement teaching and learning resources. However, over the years and upon request, the readership has now expanded.

We welcome news and information from readers to include in future editions – please [email us](#).

London School of Architecture module leader shortlisted for 2025 RIBA Stirling Prize

One of The London School of Architecture's newest module leaders, Hugh Strange, has been shortlisted for the RIBA Stirling Prize 2025 – the UK's most prestigious architectural award.

His project 'Hasting House' has been recognised alongside the Elizabeth Tow, home to the iconic 'Big Ben' bell, and the London College of Fashion's new home in Queen Elizabeth Park, Stratford.

Other News

Things you need to know this week:

Government initiative to unlock 12,000 homes on six sites

- The naming of six more sites to be supported by the government's New Homes Accelerator initiative leads Placemaking Resource's digest of the latest news.

North Leigh Park in Wigan and Wisley Airfirs in Guildford, Surrey, are among six sites newly added to the government's New Homes Accelerator initiative that together have the potential to be developed with 12,000 homes. Under the initiative, the government and its agency Homes England provide targeted support to help address barriers to delivery. The four other new beneficiaries of the initiative are Cometrowe Garden Community in Somerset, Hampden Fields in Aylesbury and two London sites, Billet Road in Redbridge and High Road West in Haringey. At least 25 per cent affordable housing will be delivered across all sites. In its first year of operation, the initiative has facilitated the delivery of almost 100,000 homes in England, through support measures including providing local areas with additional planning capacity and removing regulatory hurdles.

Also, this month –

- Midlands social landlord whg and Black Country Healthcare NHS Foundation Trust are joining forces with the aim of unlocking surplus NHS land for affordable homes.
- Government agency Homes England has named City of Wolverhampton Council as the first local authority to plot accelerated delivery of homes ahead of the new Affordable Homes Programme.
- Liverpool City Council has selected a joint venture of developers Urban Splash and igloo Regeneration as its partners in a residential development on the city's former

[Back to top](#)

Festival Gardens site.

- The government has approved the business case for a £120 million funding package to unlock a 1100-home mixed use site in Newcastle.
- Lambeth Council has agreed a partnership deal with housebuilder Vistry Group, paving the way for 500 homes to be built on six sites with the first site earmarked for 141 homes.
- Dacorum Borough Council and housebuilder The Hill Group have formed a long-term investment partnership aimed at stepping up delivery of affordable homes and unlocking regeneration across the borough.
- Major social landlord and social enterprise Places for People is in merger talks with smaller player Elim Housing, and more.

Case Study: Making cohousing stack up

- Cohousing projects can bring many social and environmental benefits but delivery of them is not for the faint-hearted, as the author of this article finds from the team behind one Dorset scheme.

When a resident of a new Dorset housing development first met local people on the neighbourhood bus, she found herself correcting a common misconception. Her home wasn't, as they had assumed from its looks, the latest of many upmarket luxury homes in the area. It was, she

Back to top

explained, part of an affordable development, developed by a cohousing group working on a limited budget and resources.

Early challenges – Building homes through a Community Land Trust (CLT) takes time, as it requires a group of like-minded people to come together, develop a project vision and realise that vision, navigating the complexities of site acquisition, funding, planning and construction.

Solution – The resulting development is true to the CLT's ambitions, while reflecting the needs of stakeholders. In all, eight of the 14 one bedroom apartments and 10 of the two, three and four bedroom houses are allocated for social rent. The remainder are for shared ownership, with 14 homes made available at 80 per cent of the market value and 13 at 25-80 per cent. The remaining 20 per cent of equity in the homes is owned by the CLT and BCHA, ensuring homes' continuing affordability.

Key learning – Both residents and architect say they have been frustrated by external systems and actors throughout project delivery.

What would change that? "Lending and the capacity for lenders to trust in a different system" says Rob Hankey, technical director at Barefoot Architects. "Having grant funding available for groups," echoes Sam Goss, Barefoot Architects' founding director, adding, "The Community Housing Fund [which the government offered from 2020-21] was almost there, but wasn't quite brave enough".

Then there's planning. On every scheme planning officers resist schemes on the basis of them being atypical design.

Read further information and the Case Study in full.

Analysis: A London Plan to unlock housing delivery

– Housebuilding in the capital has stalled in the face of viability and regulatory constraints, leading those responding to the initial consultation of the next London Plan to call for change, finds the author of this article.

The process of shaping the next iteration of the London Plan has begun, with the initial **consultation** ending in June. The new plan is set to run from 2027 to 2050 – with housing targets set for a decade – but it is today's dwindling housing delivery in the capital that provides the backdrop to the plan's preparation.

The fall-off in delivery has been stark. In the first half of the year, just 2158 private homes began construction, well below government targets, according to data from development consultancy Molior data by **consultancy Knight Frank** found the median time spent taking development sites of 100+ private homes from initial planning application to construction start increased by more than 50 per cent from 2015 to 2024, last year taking, on average, 26 months (see publication date). It says that much of that increase in time has come in the post-permission phase.

Flexibility and pragmatism – The initial consultation for the next London Plan, called Towards a new London Plan, sets out some of the options for shaping the capital's future. The housing need target set by the government of 87,992 new homes a year in Greater London is significantly up on the current London Plan's target of 52,000 homes a year and is, the major says in the consultant's foreword, "far more than we have ever built before".

For further information, what other key organisations said, and access to the article, Smit J. (2025), 'Analysis: A London Plan to unlock housing delivery?', 27 August, in full.

Coming up: Go ahead for homes and river freight hub

– Plans to deliver homes and student accommodation alongside logistics space at a safeguarded wharf site in London lead Placemaking Resource’s round of upcoming projects.

Developer Regal London has won planning consent for a scheme co-locating 208 affordable homes and 1365 purpose-built student rooms with logistics space in London’s Docklands. The 7524 square metres of logistics floorspace planned at Orchard Wharf in Leamouth is intended for use by boat operator Thames Clippers Logistics as a river-based freight hub, reinvigorating the designated safeguarded wharf. The proposals, shaped by the developer working with consultancy Montagu Evans, include more than 7400 square metres of open space, with landscaped gardens, play areas and community facilities. The design, led by architect Howells, includes an elevated riverside garden and integrates the scheme with its surrounding neighbourhood. Proposals for a mixed-use development on a former factory site to the north of the grade 1 listed Burghley House in Stamford, Lincolnshire, have been given the green light. The masterplan for St Martin’s Park, by architect ADAM Architecture for South Kesteven District Council and landowner Burghley Land, includes employment space, 342 homes and a public square, local grocery store and café.

Further information and read the article, Smit, J., ‘Coming up: Go ahead for homes and river freight hub’ 10 September, in full.

FIRE SAFETY

RICS Fire safety Hub

– containing advice for the public, building owners, landlords, corporate occupiers and RICS professionals and information on fire safety on buildings with external wall systems.

Government details fire safety-related changes to planning system

– The government has released details of new requirements in the planning system to bolster fire safety in high-rise residential buildings, in response to the Grenfell Tower Fire.

The changes come in the Ministry for Housing, Communities and Local Government's (MHCLG) plans to introduce '**planning gateway one**', which it said would deliver on one of Dame Judith Hackitt's recommendations following her independent review of Building Regulations and fire safety.

The new requirements aim to ensure fire safety matters as they relate to land use planning are incorporated at the planning stage for schemes that involve high-rise residential buildings.

The changes, which came into effect from **1 August 2021** will:

- involve the Health and Safety Executive (HSE) becoming a statutory consultee before permission is granted for development which involves or is likely to involve a high-rise residential building.
- require relevant applications for planning permission to include a fire statement to ensure applicants have considered fire safety issues as they relate to land use planning matters such as layout and access.
- help inform effective decision-making by local planning authorities or the secretary of state so that those decisions reflect and respond to the needs of the local community.

[Back to top](#)

The new requirements will be introduced by making amendments to the Town and Country Planning (Development Management Procedure) (England) Order 2015.

As announced in the Queen's Speech (11 May), the Building Safety Bill is also expected to be introduced this year, which will establish a new building safety regime in England.

Further information and access to the *Construction Manager* article, 'Government details fire safety-related changes to planning system,' in full.

Grenfell Tower Inquiry – Final report published

- The Grenfell Tower Inquiry was created to examine the circumstances heading up to and surrounding the fire at Grenfell Tower on the night of 14 June 2017.

Q&A with Harold Samuel Research Prize (HSRP) recipient, Dr Katharine van Someren

Research is a fundamental aspect of university life. It is used to gain a further understanding for assignments and dissertations and by academics to explore topics that will broaden our understanding of society and the world around us. The HSRP is an annual opportunity for those interested in the building environment to submit a research proposal on a topic that could offer sector-changing insights.

What is the relationship between job and financial security and mental health in the construction workplace?

University of the Built Environment (formerly UCEM) spoke with HSRP recipient Dr Katharine van Someren, about her research on UK construction workplace poverty. You can access [UK construction workplace poverty: the impact of financial and job insecurity on mental health](#) on UBE's publication page to learn more about Katharine's research.

University of the Built Environment mental health strategy

The strategy is designed to benefit both university students and staff, having been written with input from both stakeholder groups.

At the core of the document is the vision which states: The University of the Built Environment will take a whole institution approach to develop one community that enables students of all levels along with staff to prioritise mental health and wellbeing.

There are five strategic aims supporting this vision which are:

1. to create a supportive whole university community that promotes positive mental health, and ensures mental health is a key strategic priority.
2. to ensure the university community is informed and aware of the importance of good mental health and works to tackle the stigma surrounding mental health.
3. to ensure appropriate and timely support is provided to those who need it.
4. to develop links with external support services and stakeholders
5. to use data to evaluate and monitor the effectiveness of mental health interventions and inform future strategic development.

For more details, take a look at **University of the Built Environment's mental health strategy document**. Access the article '**UCEM launches mental health strategy**' in full.

National Trust planning principles

National Trust (NT), a charity that works to preserve and protect historic places and spaces – for ever for everyone.

The National Trust protect historic houses, gardens, mills, coastline, forests, woods, fens, beaches, farmland, moorland, islands, archaeological remains, nature reserves, villages, and pubs. While they are very passionate about open spaces and historic places, they also work hard in other areas too, including the environment, food, farming, transport, and heritage – to name but a few.

Most of the work they do though is affected by much wider global issues, which is why their interests extend far beyond just bricks and mortar.

National Trust (NT) – “Our planning principles”

The National Trust principles are used to guide them in their decision-making on the way land is developed and managed and include:

1. **Seeking to influence** – The NT seek to influence the planning system at local, regional, and national levels,
2. **Supporting spatial planning** – The NT support spatial planning which takes a holistic approach to its environment and its resources,
3. **Sensible management** – The NT promotes the wise management of the natural environment and built and cultural heritage,
4. **Protecting our environment** – The NT will seek to protect wild and remote landscapes from built development or urbanisation.
5. **Using property management plans** – In managing its land through management plans, the NT will support and help to achieve objectives,

[Back to top](#)**NT Planning principles continued.**

6. **Objecting to proposals, where appropriate** – The NT object to land use or marine-based proposals that have a significant adverse impact on its properties and their settings and context, or in its wider interests.
7. **Using a sustainable construction approach** – When proposing development on their land to meet justified needs, the NT will use a sustainable construction approach.

This will include the following:

- Minimising resource use and generation of waste,
- Being energy efficient,
- Minimising or preventing all types of pollution and risk of flooding,
- Safeguarding important wildlife, landscape, and historic interests,
- Respecting local/regional distinctiveness, supporting local sources for goods and services where practical, and
- Encouraging community involvement and access.

Foster + Partners Projects

Foster + Partners Projects – one of the most innovative architecture and integrated design practices in the world. Over the past four decades the practice has pioneered a sustainable approach to architecture through a strikingly wide range of work, from urban masterplans, public infrastructure, airports, civil and cultural buildings, offices and workplaces to private houses and product design. By visiting their website, you can gain further information about their current and past work, upcoming projects, and gain access to their–

New RIBA Plan of work 2020

RIBA Plan of Work 2020. This blog takes a look at the new RIBA Plan of Work 2020.

What is the RIBA Plan of Work?

The Royal Institute of British Architects (RIBA) first published the RIBA Plan of Work. in 1963. It originally provided a matrix to show the roles of participants in the design and construction processes. It has since been updated in several editions, most recently in 2020. This has allowed it to adapt to the complexity of modern projects, industry demands and legislative and regulatory requirements.

What changed in 2020?

In 2020, key changes were made to reflect the importance of sustainability and Building Information Modelling (BIM) in construction. The Plan of Work now also incorporates issues such as digitisation of the industry, Modern Methods of Construction, ethical issues, the value of aftercare and timing relating to planning applications and procurement. This has included restructuring and renaming of the work stages from the 2013 Plan of Work:

0 – Strategic definition – no change

1 – Preparation and briefing – brief amended to briefing

2 – Concept design – no change

3 – Spatial coordination – formerly Developed design

4 – Technical design – no change

5 – Manufacturing and construction – formerly Construction

6 – Handover – formerly Handover and close out

7 – Use – formerly in use

Caulmert’s journey from BIM Level 2 to 19650

– Many construction businesses and their projects are still transitioning from BIM Level 2 to the next stage, namely the ISO 19650 suite of information management standards. Engineering Caulmert has recently gained certification to 19650: its BIM manager, Tim Williams, discusses his and the firm’s journey to the standard.

Caulmert was founded in 2008 and now has 50 staff with offices in St Asaph, North Wales, as well as in Bangor, Altrincham, Nottingham and Kent. It has a turnover of more than £8m and works across a number of sectors, including commercial, education, residential, healthcare, energy and prisons.

Not only has Caulmert committed significant investment in time and money to adopting 19650, it is also one of the few companies that has gone the extra mile of undergoing certification to the process. Certification to ISO 19650–2 focuses on how information is managed during the design and construction stages of a project.

Key aspects include:

[Back to top](#)

- Establishing an information management process;
- Developing Employer's Information Requirements (EIR);
- Creating a BIM execution plan (BEP);
- Managing a common data environment (CDE); and
- Defining information exchanges and approvals.

In this article, Tim Williams, BIM Manager at Caulmert is asked a range of questions including: Why did you decide to get 19650 accreditation? Was it to demonstrate your commitment to clients or to reinforce internal disciplines.

Gain access to further information and full access to the article by Chevin D (2025), entitled, '**Caulmert's journey from BIM Level 2 to 19650**', 15 August, **CIOB CM Digital Construction**.

Other CM Digital (formerly BIMPLUS) articles, projects and case studies include:

- **How should the infrastructure pipeline tool be developed**, 15 August 2025
 - The government's infrastructure pipeline tool is only a month old (see publication date), but the Construction Leadership Council (CLC) has issued proposals for how it should be developed further.

– Input from RICS Professionals ensure RICS surveys are leading indicators in the real estate industry.

UK Economy and Property Market Update, August 2025

– Challenging economic outlook remains a drag on real estate and construction.

Summary: Although some of the concerns around tariffs have eased, the macro environment remains a source of uncertainty. The recent ‘hawkish’ base rate cut from the Bank of England has encouraged money markets to dial down expectations of further easing while considerable speculation is already underway around probably tax increases in the autumn budget. Against this backdrop, feedback from both the real estate and construction industries remains generally subdued.

Construction Sector

The latest ONS data points towards an increase in output of more than 1% in the second quarter. However, we would continue to caution about the quality of this series. The Construction Products Association highlights two particular issues; first, the data appears to underestimate costs, so when removing price from the nominal numbers, it overestimates volume and second, there may be a survivor bias in the contractor survey because of a rise in insolvencies. A more cautious assessment of the industry picture aligns with the latest feedback to the RICS survey where a Q2 net balance for workloads of –3% follows a –1% in Q1. The breakdown by sector is captured in Chart 10 which shows that workloads in infrastructure appear to be the only segment of the industry showing growth; All other areas are either flat or negative in net balance terms.

Note: Previous quarters have been covered extensively within *Knowledge Foundations*. Current and archived copies are available via section 6 of the VLE e-Library as well as the Research Repository.

Source: RICS Economics Research: *RICS UK Economy and Property Market Update* (August 2025), London: RICS, p5 – Chart 10.

Read the full piece of research 'RICS UK Economy and Property Market Update, August 2025'

Also:

UK Economy and Property Market Chart Book, Q4 2020

– Output is likely to drop again the last quarter of the year (see publication date).

UK Residential Market Survey: August 2025

– Sales market activity continues to slow.

- New buyer enquiries fall for a second straight month, with a decline in agreed sales also reported,
- House prices drift lower at the aggregate level,
- Sentiment on the near-term outlook remains cautious.

The feedback to the August 2025 *RICS Residential Market Survey* signals a continued slowdown in sales market activity, with most parts of the UK now seeing a decline in the volume of new buyer enquiries coming through. Moreover, forward-looking sentiment point to this subdued backdrop remaining in place over the coming months, while the consensus view among respondents for the year

- [Back to top](#)

ahead has turned largely flat.

Looking at the new buyer enquiries indicator, the August net balance of -17% marks a further deterioration compared to the reading of -7% returned in the previous iteration of the survey. As such, this measure suggests the fall in buyer demand gathered impetus over the month, with most parts of the UK now seeing a negative trend emerge.

In parallel to this, agreed sales also appeared to fall at a sharper rate than they reported last month, evidenced by the net balance slipping to -24% from -17% beforehand. Looking ahead, sales activity is anticipated to remain broadly flat in the coming three months, with a net balance reading of -2% being registered (marginally weaker than the reading of zero found in the July results).

Read the latest RICS UK Residential Market Survey: August 2025 in full.

RICS – SPACIOUS 千居 Hong Kong Residential Monitor / Market Survey: July 2025

- Sales market activity strengthens with near-term outlook also more upbeat.

- Headline Confidence Index reflects a more stable market,
- Buyer demand moves into positive territory, and
- House prices fall further but rate of decline appears to slow considerably.

The July 2025 *RICS-Spacious Hong Kong Residential Property Monitor* results are noticeably less downbeat than in previous months. Indeed, several headline indicators across the sales market in particular saw a recovery over the month. Reflecting this, the latest aggregate Confidence Index (Chart 1 shown overleaf) came in at -3, a significant improvement on June's deeply negative reading of -18.

[Back to top](#)

Chart 1: Confidence Index*:

– *RICS-Spacious HK Residential Monitor* is a monthly guide to the trends in HK's housing market. The report is available from the [RICS website](#) along with other surveys covering global housing, commercial and land markets, as well as construction industry.

Global Commercial Property Monitor (GCPM), Q2 2025

– Market activity remains stagnant at the national level, although trends appear stronger across Central London.

- Occupier demand metrics largely flat across most mainstream sectors, albeit Central London continues to exhibit relatively stronger momentum,
- Investment enquiries show little to no growth at the national level,

[Back to top](#)

- Moderate rental and capital value growth anticipated within the prime office and industrial sectors, although secondary markets continue to display negative projections.

The Q2 2025 *RICS UK Commercial Property Monitor* results point to a broadly stagnant backdrop, with headline measures of demand sitting in neutral territory on both the occupier and investment sides of the market.

Meanwhile, views on the current stage of the property cycle are deeply divided, with 35% of respondents sensing the early stages of an upturn are underway, while an identical share feel the market is still turning down.

2025 Forecasts – Global real estate investment: 2025 and beyond

© Savills Market Trends, 2024

- After a sharp downturn in real estate capital markets, sentiment is starting to turn. But how quickly will recovery follow? Savills project global real estate investment will rise by 7% to US\$747 billion in 2024, with further growth to US\$952 billion forecast for 2025.

Back to top

The past 18 months (see publication date) has been notably quiet for global real estate capital markets. In 2023, investment fell to US\$699 billion, the lowest level since 2012, with the first half of 2024 following a similar trend. Much of this downturn is due to cyclical factors, particularly a generational shift in interest rates in most major markets.

But these cyclical factors are starting to reverse. Central banks across major economies have begun to cut policy rates, fears of a global recession have largely been quelled and occupational markets remain resilient. The fundamentals of real estate **continue to attract institutional investors.**

So what do these positive signs mean for future global real estate investment?

We've already seen some early signs of this optimism coming through capital markets. Investment turnover has stabilised, with institutional investors starting to return to the market, increasing their market share to the highest level since 2021.

Savill's forecasts, which cover over 90% of the global market, expect turnover to increase by 7% by the end of 2024, reaching US\$747 billion. This recovery is anticipated to gather momentum in 2025, with investment forecast to rise by 27% to US\$952 billion. By 2026, global activity is expected to surpass the US\$1 trillion mark for the first time since 2022.

Future global real estate investment

© Savills Market Trends, 2024

Source: Savills Research using MSCI RCA, Macrobond, and Oxford Economics.

[Back to top](#)

Global investment throughout this article refers to investment in Australia, Canada, China, France, Germany, Hong Kong, India, Italy, Japan, Netherlands, Singapore, South Korea, Spain, Sweden, United Kingdom, and United States. In total, this represents over 90% of global investment.

Regional investment forecasts – Much of this initial growth is supported by a recovery in Europe. With all major central banks in the region having started rate cutting cycles in the summer, commercial real estate is looking for a lot more attractive. Pricing plays a role here too – values across Europe have corrected quickly, allowing buyer expectations to be met. However, it is important to take base effects into account for context; Europe experienced the largest decline in investment in 2023.

[UK Poverty 2025: The essential guide to understanding poverty in the UK](#)

[Back to top](#)

- This report sets out the nature of poverty in the UK in the run-up to 2024's General Election. It also sets out the scale of action necessary for the Government to deliver the change it has promised.

This is the first UK Poverty report to be released under the new Labour Government. Much of the latest data on which this report is based ends before the election. However, using JRF's cost of living tracker, we see the unacceptably high levels of poverty we referred to in last year's report persist, with economic security out of reach for millions of people. This is an urgent problem that the new Government needs to address. There were some helpful pledges in its manifesto on child poverty and ending the need for emergency food parcels, but much more will be needed if they are to be successful in 'Driving down poverty in every part of the country.'

– The Smith Institute is a leading independent 'think tank' which promotes progressive policies for a fairer society. They provide a high-level forum for new thinking and debate on public policy and politics. Through research, reports, briefings, monographs, events, lectures, education, and their website, the Institute offers a platform for thought leadership on a wide range of topics.

Making retirement living affordable: the role of shared ownership for older people

APPG on Housing and Care for Older People (2023)

The Smith Institute supported the All-Party Parliamentary Group (APPG) on Housing and Care for Older People inquiry and report into the role of shared ownership housing for older people.

The report from the Inquiry Panel highlights and evaluates the key issues concerning the development of the market for shared ownership for older people, with particular regard to the government's current Older People's Shared Ownership (OPSO) scheme. It then, in respective sections on the key issues, comments on the current situation and set out recommendations for improving the offer and supporting the growth of the sector.

Temporary accommodation at crisis point: Frontline perspectives from London and Greater Manchester

Farrelly, M., and Hackett, P, The Smith Institute (2022)

- This report examines statutory homelessness and temporary accommodation (TA) in London and Greater Manchester.

It is a public policy facing report to shed light on what is currently happening with the supply and demand of TA and to open up a wider discussion around what can be done to improve the situation going forward. It is not intended as an academic or technical comparative analysis of the different boroughs homelessness activities.

The findings and evaluations are based on extensive desk research and one to one interviews with housing officers and other housing professionals, housing providers, investors, politicians, experts, homelessness charities and campaigners. We also hosted two virtual roundtable discussions in the Spring of 2022 on Greater Manchester, chaired by Paul Dennett, Salford City Mayor and Deputy Mayor for Greater Manchester, and on London, chaired by Tom Copley, London Deputy Mayor for Housing and Residential Development.

Where relevant we have highlighted what specific boroughs are doing and have included examples of best practice and new ideas and approaches. We have laced the report with anonymised quotes from the interviews and made reference to the work of the GLA, London Councils, GMCA and other relevant organisations. We have evaluated the data and opinions and on the basis of what we've offered a series of talking points and policy recommendations. The concept of a TA system as used in this report

[Back to top](#)

combines the boroughs' statutory duties under the Homelessness Reduction Act (2017) and their responsibilities under relevant housing legislation and regulations.

The report covers the GLA and the 32 Greater London boroughs and the GMCA and its boroughs (Bolton, Bury, City of Manchester, Oldham, Rochdale, Salford, Stockport, Tameside, Trafford, Wigan). The data was drawn mainly from DLUHC, GLA, GMCA and other official statistics, as well as information collated by the boroughs, housing charities and professional bodies.

As of **September 2025**, the latest House of Commons Library, [Research publications](#) incl.

1. Research for Commons business,
2. Employment Rights Bill 2024–25: Lords stages and amendments,
3. Social rented housing in England: Past trends and prospects

[Review House of Commons Library, Research for this week](#)

As of **September 2025** the latest [House of Commons Research](#):

Under '**Education**' and within 'Social policy,' the top research briefings incl.

1. **The Lifelong Learning Entitlement** – This briefing explains the government's plans to introduce a Lifelong Learning Entitlement. It also considers reaction and issues raised by the education and employment sectors.

Also:

2. **Childcare support for students** – Find out what support for childcare costs parents can get while studying.
3. **Degree apprenticeships** – This briefing explains what degree apprenticeships are, how they are regulated and funded, and how many people start one.
4. **Special Educational Needs and disabilities (SEND) in England** – Find data for English Constituencies and local authorities on SEND.

Under '**Housing and Planning**' and within 'Social policy,' the top research briefings incl.

1. Housing market: Economic indicators,
2. Is planning permission required to house asylum seekers in hotels? and
3. Renters' Rights Bill 2024–25: Consideration of Lords amendments.

Under '**Energy,**' '**Environment**' and '**Climate change,**' and within 'Science, Environment and Technology' include:

1. Gas and electricity prices during the 'energy crisis'

[Back to top](#)

- and beyond,
2. Data centres: planning policy, sustainability, and resilience,
 3. Droughts in England,
 4. Future water resources, and
 5. The UK's plans and progress to reach net zero by 2050.

[House of Commons Library search](#) on '**construction industry**' identifies 18 key documents, that incl. 'Taxation in the construction industry', 'CITB – Construction Industry Training Board Levy', and '**The construction industry: statistics and policy, Dec. 2019**' –

Abstract: Construction industry – employment, new orders, output. [Construction 2025](#), [The Farmer Review](#) and the [Construction Sector Deal](#) (part of the government's [Industrial Strategy](#)).

Key statistics – In 2018, the construction industry contributed £117 billion to the UK economy, 6% of the total.

Economic output in 2018 was slightly down on 2017, the first fall since 2013.

There are 2.4 million construction industry jobs in the UK in Q2 2019, 6.6% of all jobs. There are more constructions jobs now than at any time since 2007, although throughout this period, roughly the same proportion of jobs have been in construction.

The construction industry is unusual because of the high proportion of self-employment in the sector – 36% in Q2 2019, compared to the average for the whole economy of 13%.

New orders to the construction industry were worth £61.7 billion in 2017. This is 13% down in 2017, the first fall since 2011. New housing orders accounted for 35% of all construction orders, commercial orders accounted for 25% and infrastructure orders accounted for 19%.

e-Journal Review

Built Environment Industry Journal titles reviewed by the University of the Built Environment e-Library

MODUS

MODUS – the RICS magazine that brings you the latest news and views, expert advice and in-depth features spanning the breadth of the surveying profession around the world.

In the latest digital **MODUS** (**September 2025**),

‘How did Right to Buy change the UK housing market?’ –

As the UK government announces that all newly built social housing will be exempt from Right to Buy for 35 years, *Modus* looks at what the data tells us about the landmark housing policy.

Subject Terms/Keywords: Economics; Housing; Property finance and investment; Residential; Residential valuation; Valuation.

Latest articles within *Modus*:

– ‘How surveyors are tackling Regent Street Disease’ –

One of the most challenging issues in managing early 20th-century steel-framed buildings, it can be catastrophic if left untreated.

Subject Terms/Keywords: Building conservation; Building control; Commercial property; Dilapidations; Health and safety; Heritage and conservation.

– ‘Your expertise is the foundation of our success’ – The Organisation is a trusted voice for the UK government on matters shaping the built and natural environment, says Nick Maclean, Acting President of RICS.

Subject Terms/Keywords: Building surveying; Housing; Learning and development; Quantity surveying and construction; RICS standards and guidance; Valuation.

[Back to top](#)

Also:

– **‘The great British lido revival’**. – Once at the heart of their communities, many UK lidos fell into decline in the late 20th century. Now they’re making a comeback as valuable community assets.

– **‘The bold plan to increase New York’s housing supply’** – From Germany embracing plug-in solar units for homes, to solar slates on York Minster, *Modus* highlights the future of photovoltaics.

– **‘Why green roofs are crucial for biodiversity net gain’** – How a major shake-up of zoning regulations could mean a central role for quantity surveyors in the US.

– **‘What’s the best way to get a pay rise in surveying?’** – The latest Macdonald and Company Salary Rewards and Sentiment Report finds that global skills shortages are creating a competitive talent market.

The most shared articles on Modus in 2024. – Profiles of chartered surveyors with fascinating jobs were a big hit in 2024, highlighting the wide of career paths out there for those entering the profession.

Subject Terms/Keywords: Building surveying; Cities and placemaking; Facilities management; Housing; Projects and people; and Valuation.

What were the most-read Modus articles of 2024? – As another eventful year in the built environment draws to a close, *Modus* brings a roundup of the most popular features RICS published in the last 12 months.

– This year *Modus* has covered topics spanning the built and natural environment, ranging from staircase design to spaceport construction and even surveying shipwrecks.

1. How much are you paid – and should you get more?
2. Sphere, Las Vegas: how green is that screen?,
3. Building Everton’s new stadium: ‘the people’s project’,
4. Boring tunnels: the Las Vegas loop,

[Back to top](#)

5. How Luton Town revamped its stadium in just three months,
6. Could filling empty homes solve the housing crisis?,
7. Stephen Radford MRICS: the pub surveyor,
8. Why AssocRICS paves the way for a career in surveying,
9. Could 3D printed houses transform the built environment?, and
10. Preserving a national treasure: the Royal Albert Hall.

And as a comparison ...**What were the most popular stories of 2023 on Modus? –**

Topics related to climate change and architecture have it into our top 10 most-read articles in 2023.

The Top ten most read articles include the following:

11. Which real estate sector pays the most?,
12. Future-proof: retrofitting commercial property,
13. Brutal or beautiful? The Barbican Estate,
14. Alexandra Revell MRICS: renovating the Royal Albert Hall,
15. At your convenience: the importance of good toilets,
16. From soldier to surveyor,
17. Alan Bainbridge FRICS: transforming the BBC's estate,
18. Buildings that elevated cities: The Shard, London,
19. What are the most important features of office design?, and
20. How to ensure biodiversity net gain in developments.

Subject Terms/Keywords: Commercial property; Commercial valuation; Corporate real estate; Economics; Residential; and Sustainability, and more.

Please note: In addition to *MODUS*, RICS publishes other journals that are free to view online incl.

1. **Construction Journal** – The journal helps **quantity surveyors** and project managers with the technical and professional aspects of their day jobs and keep up to date with developments and practical matters in the profession. It covers topics including contracts, cost

[Back to top](#)

management, procurement, construction law and regulations, communications, and project management skills.

2. **Built Environment Journal** (Incl. Building Surveying, Building Conservation, and Building Control) – Coverage keeps practitioners in the disciplines of building surveying, building control, and building conservation up to date on the latest developments, products, standards, and guidance.
3. **Land Journal** – The journal emphasises the crossovers in these practice areas and their global nature, with articles contributed by experts from all over the .
4. **Property Journal** – The journal contains high-quality technical material in clearly defined sections, as well as some material that crosses professional groups to reach a wider audience.

Advances in Online Education: A Peer-Reviewed Journal

is a peer-reviewed title with an interdisciplinary approach, publishing best practice articles as well as theoretical and applied research and analysis, covering developments in virtual, distance, online, blended and e-learning in a variety of technology-enhanced educational settings.

In-depth articles and case studies scheduled for the new volume, **Vol 3, Number 3 (2024-2025)** of **Advances in Online Education: A Peer-Reviewed Journal** incl.

Vol 3, Number 3 (2025)

Opinion piece(s)

1. Celebrating quality in online learning.

Online Education Papers

1. Pedagogical innovation in strategic management education: A case study of course redesign for virtual-hybrid delivery 204-216.
2. Evidence-based online content design.
3. Global citizenship education via experiential blended learning.
4. Pay attention to the chatbot behind the curtain when AI 'is no place like home': A framework and toolkit for integrating critical thinking and information literacy in educational and professional settings.
5. Navigating seas of change: Surfing higher education's wild generative AI wave.
6. Education as a service: Unlocking new possibilities.

Also:

Vol 3 (2024-25) of **Advances in Online Education: A Peer-Reviewed Journal**

Vol 2 (2023-24) of **Advances in Online Education: A Peer-Reviewed Journal**

Vol 1 (2022-23) of **Advances in Online Education: A Peer-Reviewed Journal**

Corporate Real Estate Journal is the essential peer-reviewed, professional journal for corporate real estate executives.

[Back to top](#)

Each quarterly 100–page issue publishes high quality articles and real case studies on new thinking, strategies, and techniques in corporate real estate. It cuts through the deluge of information facing corporate real estate professionals to deliver content, which is authoritative, practical, and relevant by providing a blend of genuine thought-leadership – which expands what can be achieved with corporate real estate – with detailed, actionable advice and ‘lessons learned’ from industry peers.

In-depth articles and case studies scheduled for the new volume, **Vol 14, Number 4 (2024–2025)** of

Corporate Real Estate Journal incl.

Vol 14, Number 4 (2025)**Research Paper**

1. Automation opportunities and challenges for corporate real estate and allied industries.
2. Bayer’s journey from initiating to implementing integrated facilities management solutions and an outlook towards the next level of dynamic integrated facilities management.
3. Avoiding disastrous data-based decisions: The secret to meaningful workplace insights.
4. Thinking versus doing: The value of thoughtful decision making in the built environment in the context of pressure towards action.
5. The hybrid condition: Decision making and adoption of hybrid strategies – perception, power and the bottom line.
6. Navigating uncertainty in CREM: Quantitative, qualitative and location-related adaptation of offices in times of structural change.
7. Driving progress in corporate real estate with artificial intelligence and machine learning.
8. Efficiently divesting special assets: Strategies for documenting a clean sale.
9. Realising the value of smart buildings with enterprise agility.

e-Book Review

© Routledge, 2019,

© Routledge, 2022

Managing Diversity and Inclusion in the Real Estate Sector

Clack A and Gabler J (2019) *Managing diversity and inclusion in the real estate sector* [e-book], Oxon: Routledge. e-ISBN-13: 9780429428975

- *Managing diversity and inclusion in the real estate sector* is the first to place D&I at the centre of successful real estate and construction organisations. It provides guidance to, and most importantly, actions for professionals in the sector who want to make D&I an inherent part of the culture of their organisation. This book has been written to bring the sector up to speed with what D&I is all about and how a D&I strategy can be implemented to secure future success.

Real Estate: The Basics

Forsyth, J. and Wilcox, J. (2022) *Real Estate: The Basics*, Oxon: Routledge. ISBN-13: 9780367725433

- *Real Estate: The Basics* provides an easy-to-read introduction to the core concepts of the industry to students new to the subject or professionals changing direction within the sector. The book encapsulates the key 'need to know' aspects of Real Estate including the 'language' of real estate; its value and contribution to countries' GDP; its primary purpose, whether as an asset

or as a resource; valuation concepts; asset classes; basic concepts of land law, and of landlord and tenant law; the increased role and importance of sustainability and technology; and an overview of the wide range of professionals involved in the industry.

Book of the month: Understanding Research Methods

Newhart M (2023) *Understanding Research Methods* [e-book]. Oxon: Routledge. ISBN-13: 9781000839166

In the eleventh edition of *Understanding Research Methods: An Overview of the Essentials*, Newhart and Patten leverage the principles of learning and content design to present the fundamentals students need to get started in research. Basics of quantitative and qualitative research are covered in short, independent topics and grouped into meaningful sections.

A perennial bestseller for over ten editions, *Understanding Research Methods* focuses concisely on key concepts, and lessons in topics that are “chunked” to suit today’s students. Each topic ends with suggestions for planning a research project by answering topic-specific prompts in a research planning journal. Topic Review exercises encourage active learning.

Adding some Tec-Variety: 100+ Activities for Motivating and Retaining Learners Online

Bonk C J, and Khoo E R (2014) *Adding some Tec-Variety: 100+ Activities for Motivating and Retaining Learners Online* [e-book]. CreateSpace Independent Publishing Platform, e-ISBN-13: 9781496162724.

- **[Access the free online book Adding Some TEC-VARIETY.](#)** Please note: The authors have made an online version of this work available under a **[Creative Commons Attribution-Non-Commercial-Share-Alike 3.0 Licence.](#)**

Emerald Insight – the online platform for Emerald Publishing.

© Emerald Publishing 2021

Emerald champions new ideas in advancing the research and practice of business and management, and manages a portfolio of nearly three hundred journals, including a 'Property Management and the Built Environment' collection that the University of the Built Environment subscribes to.

Emerald works in close collaboration with numerous academic (including University of the Built Environment) and corporate organisations worldwide. Emerald Publishing endorses the e-Library's tailor-made research reports – a service provided to university tutors to help supplement teaching and learning materials on subject-specific areas.

LATEST [September] – Global academic publisher Emerald Publishing Limited has acquired (05/25) **now publishers**. Founded in 2004, **now publishers** is a leading source of academic content, publishing research monographs, journals and Foundations and Trends® (FnT) with strengths in the areas of Business, Economics, Computer Science and Engineering. The sale comprises over 50 books, 14 peer-reviewed journals and 28 Foundations and Trends® serials.

Remember:

"A Librarian is a powerful search engine with a heart, that listens and understands the library and information requirements of others and provides a response in a format that suits their needs" says Lucy Roper, Information Governance Manager and who can be contacted on the library@ube.ac.uk email address

Building Better Property Professionals

Property Elite's sole aim is to build better property professionals – supporting your career every step of the way, whether you are completing a RICS accredited degree course, your RICS Assessment of Professional Competence (APC) or simply seeking engaging Continuing Professional Development (CPD).

© 2022 — Property Elite LLP

Property Elite provides training and CPD services for property professionals, including students, APC candidates and corporate clients. Their Hot Topic Highlight blog posts will arm you with the information on the hottest topics – ready to tackle an important client meeting or begin revising for your RICS APC final assessment.

This month [**September 2025**] the **Hot Topic Highlight/Blog – [RICS Professional Standard Service Charges in Commercial Property \(2nd edition\)](#)**

In this week's blog, *Property Elite* take a look at the new *RICS Professional Standard Service Charges in Commercial Property (2nd edition)*. This is essential knowledge for all RICS APC candidates with the Property Management (Commercial) competency. This supersedes the former 1st Edition (which became effective in April 2019) with changes to promote best practice, consistency, reasonableness and transparency in relation to this area of practice.

The 1st Edition was one of the most downloaded RICS guidance documents, proving its popularity and success in setting best practice standards for service change management. **[Access the full Professional Standard and supporting documents.](#)**

Building People

Enabling connections for a competent, diverse, and valued built environment workforce

The aim of 'Building People' was to create a technology platform and collaborative network, which enables connections and seeks to reduce the skills shortages across the Built Environment. 'Building People,' a social enterprise that aims to connect people traditionally not involved in the Built Environment sector with employers seeking to plug the skills gap via an online platform.

People Wiki:

What are you looking for?

© Building People 2021

People Wiki (a free, open access knowledge sharing platform for diversity and inclusion, skills and careers, and social value.) is a crucial part of Building People's ambition to create a single platform that brings together a multitude of previously fragmented information, knowledge, resources, opportunities, and needs focused on diversity and inclusion, skills and careers, and social value.

Related Link: University of the Built Environment incubated social enterprise, Building People, becomes a fully-fledged success story – It is an exciting time for Building People as it announces its three-year plan, which focuses on five key areas:

1. **Profile:** Positioning Building People as the go-to source for equality, diversity and inclusion best practice and activities, and though leadership in the built environment,
2. **Partnerships:** Delivering maximum joined-up impact through the growth and development of Building People's supply and demand networks,
3. **People:** Enabling equality of opportunity through the provision of a simpler and more supported user experience in a fragmented careers landscape,
4. **Policy:** Aligning with and supporting the achievement and enhancement of relevant national sector policy and activity, and
5. **Planning:** Establishing a secure future of Building People as a sector-backed movement for collaborative change across the built environment.

[Back to top](#)

UBE's Sustainability Hub

Sustainability supports the University of the Built Environment's vision and core purpose to provide truly accessible, relevant, and cost-effective education, enabling students to enhance careers, increase professionalism and contribute to a better sustainable built environment. **Note:** The University of the Built Environment has a Sustainability Hub within the VLE e-Library where you will find interesting resources, news, articles, projects and publications which support and information 'future skills' for sustainability within the construction, surveying, and property industries.

LATEST: University staff and students can now access the Supply Chain Sustainability School

Reproduced with permission

The Supply Chain Sustainability School represents a common approach to developing sustainability competence in the supply chain and is part of a continued commitment to lead the industry into a brighter, more sustainable future.

(**Note:** University staff/students can freely register with their university email address)

UK sets 'most ambitious' climate target to cut emissions by 78% by 2035

The BRE provides leading edge information and advice on all aspects of sustainable that include – Sustainable construction of buildings, Communities, Infrastructure, Sustainable organisations, Materials, products and services, Waste management, Energy management services, and Training and publications.

Access BRE Sustainability: Practical guidance and support for delivering genuine sustainability benefits.

Building Cost Information Service (BCIS)

The **BCIS** has launched a free-to-access benchmark tool – **Built Environment Carbon Database (BECD)**, for infrastructure carbon assessment in the UK construction industry.

The Routledge Sustainability Hub

The Routledge Sustainability Hub is an innovative Knowledge Centre for the global sustainability community, this Hub offers a wide range of resources for everyone – whether you are a teacher, a student, a professional or a citizen of the earth curious to discover more about the many facets of sustainability.

Access the Routledge Sustainability Hub

QSAND and the Sustainability Goals

The UN Sustainable Development Agenda, adopted by world leaders in 2015, maps out a 15-year plan to fight inequality, end poverty and tackle climate change challenges. Quantifying Sustainability in the Aftermath of Natural Disasters (QSAND) is a self-assessment tool to promote sustainable approaches and contributing to aid the achievement of several of these 17 goals in disaster affected global communities:

Libraries' contribution to SDGs

Agenda Vision: Universal literacy

Goal 3: Good health and wellbeing

Goal 4: Contribution to quality education

Goal 5: Culture

Goals 5, 9, 7: ICT skills and access

Goals 8 & 10: Decent work, economic growth, reducing inequality

Goal 16: Access to information

Note: Information plays a vital role in just about everything we do.

(UN.org 2022)

*** Note: Use of Wikis as a reference site**

Wikipedia and use of other Wikis are increasingly being used by people in the academic community, as an easy source of information about anything and everything. However, citation of Wikipedia may not be considered acceptable, because Wikipedia is not a creditable source. It is important to note that whilst Wikipedia may be one of the Web's most popular reference sites, it is not classed as a credible resource because anyone can be a contributor to the website.

This can be avoided by following two simple rules:

1) Remember that an encyclopaedia (which includes Wikipedia and any other Wiki) can be a good starting point for research and not an ending point.

2) An encyclopaedia can be good for getting a general understanding of a subject before you extend your study of the subject further. But you then must consider the subject in more depth using books, journals articles and other appropriate and credible resources. What you find in these other sources of information will be more detailed, more precise, and more carefully reasoned than the summary you found in an encyclopaedia. The sources you reference/cite in your work will therefore be these more detailed sources you have used.

University of the Built Environment signs up to CIC's new 'carbon zero' climate action plan

University of the Built Environment (formerly UCEM – University College of Estate Management) is one of the institutions which has signed up to the Construction Industry Council's (CIC) new climate action plan.

CIC's Climate Change Panel, chaired by its deputy chairman, Stephen Hodder MBE, led on the initiative, with signatories to the plan agreeing that:

CIC BUILT ENVIRONMENT
PROFESSIONS TOGETHER

Carbon Zero: the professional institutions' climate action plan

The signatories to this Action Plan agree that:

- the actions listed are necessary for dealing with the challenge of climate change;
- they will implement those actions appropriate to them as an institution/organisation; and
- they will support the other signatory institutions and organisations in delivering the remaining actions

© CIC 2021

The document, entitled 'Carbon Zero: the professional institutions' climate action plan,' was released last week and coordinates the efforts of built environment institutions in meeting the UK government's 2050 net zero emissions target.

To read the plan, head to the [**CIC news story – 'CIC launches a Carbon Zero climate action plan for Professional Institutions'.**](#)

5 practical tips for saving energy costs

– The cost-of-living crisis has spread across the globe. Significant increases to the cost of food and energy have outstripped worker's salaries, and spiralling inflation has plunged countless into poverty. While the tenth day of COP27 focussed on the decarbonising our energy systems, University of the Built Environment looked at practical ways to save energy that can be actioned without spending too much money.

1. Avoid leaving appliances on standby – The average UK household spends around £65 a year on appliances that are left on standby. This is the energy consumed by an appliance when it is not in use and not switched off at the socket. You may not think about the devices that have low-level usage when not in use, such as broadband, smart speakers and telephones, but these are the ones that are usually turned on for 24 hours a day and the amount of electricity they consume adds up.. By remembering to switch off devices more often or buying a standby saver, you could be saving yourself electricity you didn't even know you were consuming.

2. Draught-proofing windows and doors – Draught-proofing is one of the most affordable and effective ways to save energy costs. It allows you to keep the warm air in your home by blocking out unwanted gaps that let cold air in – ultimately requiring less energy to heat up your home. By draught-proofing your windows and doors, you could save around £60 a year in a semi-detached house. Similarly, you could also save around £90 a year by draught-proofing an open chimney when not in use. A lot of draught-proofing can be done through simple DIY tasks at home, or professional draught-proofing can cost a bit more but last you longer.

3. Use your thermostat effectively – A large portion of your heating bills are absorbed by heating and hot water costs. By doing something as simple as turning down your central heating by just one degree, you could be saving up

[Back to top](#)

to £80 a year. You could also invest in a smart thermometer, which will heat your home more efficiently by only warming the room in use. They can be controlled by your phone and adapt to how long it takes to warm a certain temperature, so it can be set at exactly the right time.

4. Monitor your water usage – Water waste is something we may not realise is happening in our homes, but they add up and result in a large amount of total energy and water use. A dropping tap can waste more than 5,300 litres of water a year, so it's important to keep an eye on even the smallest amounts of water waster in the homes. By spending one minute less in the shower each day, a family of four could save up to £75 a year on energy and water bills. Similarly, turning off a running tap while you brush your teeth or wash your face can save more than 6 litres of water a minute!

5. Invest in energy saving appliances, like an air fryer – While it's good to buy home appliances based on their energy ratings, it's also good to research alternative types of appliances you can buy. One big change you can make is switching to an air fryer for day-to-day cooking rather than using a gas or electric cooker. Research by Utilita showed that on average they run at £55.91 a year, as opposed to a gas cooker on £121.06 per year and electric cooker on £335.57 per year.

Information Governance

The University of the Built Environment is committed to advancing information governance and compliance, ensuring that the services provided comply with the General Data Protection Regulation (GDPR), Data Protection, Freedom of Information, Records management, Copyright, and Information Security.

Information Governance:

© 2020 iStockphoto LP, Royalty free image

To make sure that information is available in the right place and at the right time to support others, the e-Library ensures that the information services comply with data protection and copyright.

Data Protection

With new technologies constantly emerging and us finding ourselves moving further into an ever more digital direction, our personal data, how it is used and who has access to it becomes a growing and global concern for all.

The General Data Protection Regulation (GDPR) was the first legislative change in recent years to address these concerns, with a broad aim to invoke a cultural shift in the way organisations manage personal data.

Further information, advice, and guidance on Data protection, GDPR and more can be found at the Information Commissioner's Office (ICO), the UK's independent authority set up to uphold information rights in the public interest, promoting openness by public bodies and data privacy for individuals.

The Copyright Licensing Agency Ltd (CLA)

The CLA are a licensing body as defined by the Copyright, Designs and Patents Act 1988 c.48 (as amended) [“CDPA”]

The CLA licence organisations to copy and re-use extracts from print and digital publications on behalf of copyright owners – authors, publishers, and visual artists. By ‘copying’ the CLA means photocopying, scanning and re-use of content from magazines, books, journals, electronic and online publications, as well as press cuttings or documents supplied by a licensed third party.

Having a CLA licence helps to reduce the risk and potential cost of copyright infringement. This requirement applies to any organisation in the business, education, public or charitable sectors.

Note: University of the Built Environment holds a **CLA ‘Higher Education Photocopying and Scanning Licence’**

[LATEST: Access the newly upgraded Copyright Licensing Agency \(CLA\) website for further information](#)

CLA Check Permissions tool

The [CLA Check Permissions tool](#) is an online search tool that lets you quickly find out what you can copy under your organisation’s CLA licence. Whether you’d like to photocopy and distribute an article to colleagues or upload a report to an intranet or VLE, the CLA Title Search simplifies the steps required to ensure compliance.

The University of the Built Environment is committed to advancing information governance and compliance, ensuring that the services we provide comply with **GDPR, Data Protection, Records Management, Copyright, and Information Security.**

Note: In 2024 the University of the Built Environment's e-Library, in collaboration with UCL, produced a short **Copyright Essentials e-learning course** (accessed via the University secure Virtual Learning Environment). This e-learning will help staff and students better understand copyright and how to apply this understanding to studies, research and other activities.

Another part of my role as involves keeping abreast of the latest developments and benchmarking the work I do against that of others. I also undertake regular Continuing Professional Development (CPD), and an element of this is attending the CITE Forum attending events and conferences provided through my professional body, CILIP – The Library and Information Association, and others.

[Back to top](#)

CILIP's National Copyright Conference 2025

This year's national & virtual conference is to be held on 22nd May. It has once again been programmed in association with Naomi Korn Associates.

#CILIPCopy25 / #copyright

The Annual CILIP Online Copyright Conference is an ideal and unique opportunity for all librarians, archivists and information professionals to update their knowledge and professional practice in this crucial area. Additionally, it appeals to those who want to update their general copyright, licensing and publishing knowledge, and provides an invaluable forum for in-depth presentations by UK experts, informed debate and opportunities.

2025's Copyright conference explores the latest updates in copyright and licensing. The programme explores different relationships, such as those between [copyright and ethics](#), [copyright and licensing](#), [copyright and creators](#), [AI and IP](#) – and all shades in-between. The programme and further information can be accessed via the [**Copyright Conference Programme 2025 webpage**](#)

Sessions covered broad copyright impact for the profession incl.

- **Keynote: Impact of copyright on teaching and research in Higher Education.**

Cristina Rusu, *Loughborough University*, will discuss whether reform is needed to support academics to be able to use copyright works lawfully as well as understand how copyright protects their research outputs.

Also:

- **Keynote: Artificial Inventors and Authors**

Professor Ryan Abbots, *Professor of Law and Health Sciences, University of Surrey School of Law*

Over the last few years, artificial intelligence (AI) has begun to step into the shoes of human content generators and

[Back to top](#)

make creative works at scale. Before the end of the decade, a significant amount of art, literature, music, software, and web content will likely be created by AI rather than traditional human authors. How should copyright law deal with this phenomenon?

Never a blank slate: culturally informed copyright services for international library users

Caitlin Mannion, *Head of Reference and Instruction Services, NYU Shanghai*

Other highlights:

- **Never a blank slate: culturally informed copyright services for international library users** – *Caitlin Mannion, Head of Reference and Instruction Services, NYU Shanghai*
- **IPO Update** – *Margaret Haig, Head of Copyright Delivery, Intellectual Property Office*
CLA Licensing & Technology Updates – *Catherine Stephen, Head of Renewals & Growth, Education & Public Sector, Copyright Licensing Agency*. This session will provide an update on the Copyright Licensing Agency's latest licensing initiatives, including developments around AI and text and data mining.
- **Lightning Talks on The Copyright Toolkit: A scenarios-based approach to providing copyright guidance** – *Diane Crawford-Leighton, Copyright Librarian, University of Exeter, &*
- **Predatory AI and its prey: Copyright IP and DP** – *Agnes Kozlowska, Head of Knowledge and Information Management, Medicines and Healthcare products Regulatory Agency*.

Presentations at the [2024 Conference](#) covered the following areas: ▪ Copyright, ethics and creator's rights; ▪ Regulatory updates in the context of the new Labour Government; ▪ Rights retention; ▪ AI and IP; ▪ Licensing, AI and TDM (Text & Data Mining).

[Back to top](#)**Also:**

- **How do we achieve success as Solo Librarians?**

Lucy Roper, Information Governance Manager,
University of the Built Environment

Being a solo librarian or librarian in a small team with limited help can be daunting. Librarianship is multi-faceted, and while plenty of books cover library work in detail, few provide a single point of reference from the perspective of a solo librarian who must juggle multiple tasks at one time and deal with all aspects of library provision on their own.

AI is creeping increasingly into our lives, and libraries have undoubtedly witnessed a rapid transformation due to AI. As we strive for continual improvement, we must keep abreast of the latest developments and follow the ever-changing library landscapes and popularity of information systems and services, online library tools and technological advancements.

I, therefore, took it upon myself to write a practical handbook providing a one-stop-shop with accompanying time-saving templates (easily downloadable via the eBook version and companion website) that can be adapted to help aid the daily activities and processes (including the effective use of copyrighted material and undertaking yearly copyright reporting) often faced by those working in information, knowledge, libraries and related disciplines.

I follow the year in the life of a solo librarian, providing a yearly planner and timeline of activities, with supporting guidance to aid each step of the way. This guidance can then be applied, adapted and tailored to other working practices. In this lightning talk, I will share the foundations of the book, identify some of the lessons I have learned, and provide examples of the types of guidance available.

Further information is available at: CILIP (2024 '[CILIP Copyright Conference 2024 programme](#)'). [CILIP.org.uk](#), Events.

The Challenges of Remote Working

– The challenges of remote working and points to consider from a data privacy perspective. Provided within this article are points to consider from a data privacy perspective that include:

1. **Have a clear statement to all staff** stressing that “The protection of personal data that we hold, and use is important to us and must be always handled in a way that is compliant with data protection law and our Data Protection and Privacy policies. While we must adapt to comply with the official guidance, we will adjust our working processes to allow us to deliver our services. These are time limited instructions that will be kept under review. At the end of the period then all data that is held temporarily on personal devices as a direct result of this exceptional times, will be deleted.” (Tullo 2020)
2. **Set out what use of data**, contact lists, customer documents are being allowed.
3. As part of this exceptional response to homeworking **keep a full record of where staff are working from and what equipment they are using.**
4. **State that you have assessed the best way of ensuring homeworking efficiency** and are proposing that personal devices and mobile phones can be used. That you will review this [weekly seem sensible at present] in line with experience and how staff report it is working.
5. **Reissue and emphasis your usual security arrangements** – Virus and password protection, not leaving data visible to others, having a PIN code, or not sharing their device with others in their family or household.
6. **Take care to be aware where data is being stored**, even if temporary so that the security risk is managed and assessed.

[Back to top](#)

The Challenges of Remote Working continued.

7. For the **weekly reviews** – have your Senior Leadership Team note the number of staff using personal devices, any queries, or issues they are finding and demonstrate that you are monitoring the situation and are flexible in closing it down if any specific concerns arise.
8. Choose your **collaboration tool of choice** and consider recording online meetings and note actions especially where team members are geographically spread out and where broadband speeds and kit may vary in quality.
9. You might also consider having a **standard introduction for homeworking staff** to explain that they are homeworking and not in the office, so callers understand the position.
10. This is where a nominated **Data Protection Office (DPO)** or Data Officer can support the senior team in the messaging to colleagues.

There are growing numbers of tips and survival guides online that include: Information Commissioner's Office (ICO) [Data protection and coronavirus: what you need to know](#).

[Back to top](#)**Regarding University of the Built Environment, we have followed these pointers:**

(i) A clear statement went to staff, and the university has a designated area within their central SharePoint site for Business Continuity Planning (BCP) that has the following folders containing

- Official Communications [Internal and External]
- Human Resources (HR) guidance and support
- Information Technology (IT) technical support, guidance, and documents

Data Protection guidance (incl. a new guidance note entitled, 'Processing Personal data when remote working.'

- The **University of the Built Environment - Data Protection and Privacy Policies** have been updated and should be read in conjunction with IT Policies).
- & Hints and tips for working from home.

(ii) A retention and destruction schedule is in place that collates lists of data used within respective teams and departments; (iii) A register is kept of where staff are working from and equipment used; (iv) Regular online meetings and weekly All-staff keep everyone updated and ensuring regular communication; (v) IT provide regular updates and guidance; (vi) GDPR training was launched to re-enforce the importance of knowing how data is used and where it is being stored, even if temporary so that risk is managed and assessed; (vii and viii) online equipment and collaboration tools are well established at the University of the Built Environment as an online education provider, but are regularly monitored; (ix) As mentioned above, hints and tips for working from home are provided, & (x) University of the Built Environment has a designated Data Protection Officer (DPO). **Please note:** There are regular updates – On the University Website, VLE and within the **Website Home > Study > How you'll learn online > The e-Library** current awareness services incl. **Knowledge Foundations**.
